## **1. PREFACE**

This Request for Proposals (RFP) is for Transformer for Angaur State, Kayangel State and Koksai Substation has been prepared by Public Utilities Corporation - Electric Power Operations (PPUC-EPO). PPUC-EPO wishes to receive Proposals from all interested persons or firms eligible to operate and with the capability to supply the services in the Republic of Palau.

## **2. BACKGROUND**

The transformers located at Angaur and Kayangel States are very old and also corroded with oil leak. Koksai substation is very old also and was bought used so we need to replace it. In this RFP Palau Public Utilities Corporation - Electric Power Operations (PPUC-EPO), wishes to get Proposals to replace Angaur and Kayangel State transformers including Koksai Substation. In order for Palau Public Utilities Corporation - Electric Power Operations (PPUC-EPO) to meet and perform the Expectation of Customer and to fulfil the needs of the PPUC-EPO Operation.

The Palau Public Utilities Corporation (PPUC) provides power, water and sewerage services to Koror and other areas in the Republic of Palau.

The Republic of Palau comprises of 350 tropical islands and islets located in the westernmost part of Micronesia about 600 miles (960 kilometers) East of Mindanao, Philippines and some 800 miles (1,280 kilometers) southwest of Guam. Palau lies between 8°10'N/3°N Latitude and 132°45'/134°25'E Longitude. The main group of Palau Islands is dominated by the 150 square mile (390 square kilometers) island of Babeldaob—Palau's largest land mass.

PPUC was created in 1994, the same year Palau gained independence as a sovereign nation. Since then, PPUC has been operating the national electric utility and the distribution facilities, which now covers about 47 linear miles of 34.5KV transmission and 114 linear miles of 13.8KV distribution lines.

Palau has a current real capacity of slightly over 28MW with power plants located at Malakal, Aimeliik, Peleliu, Angaur and Kayangel. Malakal and Aimeliik provide power to the central grid supplying Koror, and Babeldaob.

PPUC has grown from 1,500 connections while under national government management into a public utility serving over 6,800 customers comprised of 77% residential, 14% commercial, and 9% others. Last fiscal year's compiled data showed a total combined generation of 101,227 KW with the highest combined peak load recorded at 15,760 KW.
