2. PREFACE

Aimeliik Power Station has the total output of 10.0 MW and we need to have 2 x 10 MVA Power Transformer that will deliver the power to the outgoing feeder.

3. BACKGROUND

Aimeliik main substation comprises of four Oil Circuit breaker which was supplied and installed in 1986. Last December 27, 2018 one OCB blew up due to old age/material failure. This breaker is directly connected to 10 MVA Transformer # 2 as its protecting equipment.
